Envi R-900 Tonometer

Envi R-900 Tonometer

Experience precise and reliable intraocular pressure measurements with the Envi R-900 Tonometer. Utilizing the Goldmann principle, it ensures accuracy in measuring intraocular pressure. Designed for use with slit lamp with tower illumination, this instrument offers compatibility and adherence to strict manufacturing standards, making it an indispensable tool for eye care professionals.

Features:

- With a range spanning from 0 to 70mm Hg, the tonometer facilitates precise measurements.
- Each unit includes a calibration bar to maintain accuracy, consistency and reliability.
- Reusable Tonometer Cone: Promotes convenience and cost-effectiveness in daily practice.
